Minutes:

1) Calibrate the signal visualization program of LabView

2) Fine the Amplitude of a signal generated by a function generator for frequencies of 10Hz to 20kHz using LabView for measurement.

3) Determine the step values for the frequencies of 10Hz to 20kHz in the signal generation program of LabView.

4) Fine the Amplitude of a signal generated by LabView using Oscilloscope for frequencies of 10Hz to 20kHz.
